SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION SF 1449 - CONTINUATION SHEET

The following have been modified:

REQUIREMENTS

Statement of Work

Wireless Infrastructure
For
Fort Campbell Army Post

1. The Ft. Campbell Trunked Radio System consists of Government-Owned equipment manufactured by Motorola. The trunked radio system is presently connected by fiber. The infrastructure consists of interface boards and software that is proprietary to Motorola Corporation.
2. To maintain the warranty of the system, vendor shall be an authorized Motorola sales and service vendor.
3. Statement of Work: Vendor will provide Fort Campbell with the wireless infrastructure using Canopy technology (the only DOD approved system of this nature). The system must be designed, engineered to cover the specified area of coverage, provide equipment to include ancillary equipment, installation, testing and make operational in a turnkey fashion. The system must provide dual long haul wireless circuits from Bldg 7549 Clarksville Base to OP-1 rear range area at the end of Angel Road. In addition the system must be capable of providing continuous streaming video from a camera installed in the Mobile Command Vehicle (MCV) or same camera operated remotely within 100 meters of the MCV. The feed will report back to Bldg 95 at 90 Bastogne Ave.
4. Coverage area: Defined as the installation inside the fence parallel to US 41A; across the installation to Market Garden Road. From the US 79 end of SABRE Heliport to include the 160th Special Operations Aviation Regiment end of Campbell Army Airfield (CAAF). Ninety percent coverage is expected of the identified area.
5. Standards: Installation and equipment must comply with established R-56 standards for grounding and bonding.
6. Power: 110 V AC will be provided within the distance of a normal drop wire (approximately 200 meters). Vendor must coordinate with the government point of contact when identifying the locations of antenna equipment necessary to be installed. Existing physical infrastructure such as poles, buildings or etc can be used for the installation of aerial devices.
7. Future Expansion: The system must be capable of expansion of identified services, i.e. long haul services, expanded video (fixed or mobile), public safety issues, i.e. laptop notebooks within the vehicle back to a predetermined location.
8. Warranty/Response Time to Outages: The vendor will provide warranty coverage for an operational system and associated equipment for a period of one year. Response time for trouble calls will be four hours.
